EQUINE FUSION®

Happy, Performing Horses!

All Terrain Ultra

Combining the unique All Terrain sole with the well proven Ultra upper

The key features for the flexible and elastic Jogging shoe

1) Safeguards the horse's natural **balance** (utilize entire area)
2) Safeguards the horse's natural **stability** (utilize entire area)
3) Ensures the horse's need for **cushioning** (natural hoof movement, absorb shock & vibrations)
4) Promotes a more **consistent surface contact** (adapt to the hoof-ground interface, customized grip)
5) Promotes a more **natural rollover motion** (natural hoof movement, customized grip)

All Terrain Ultra

Congratulations on your purchase of All Terrain Ultra.

Horses show many variations in hoof size, shape and angle. In addition, some horses' lower limb conformation causes them to move forward with a slight twisting of the hoof during contact with the ground.

This obviously presents a further challenge to the hoof boot industry, as boots may swivel on the hoof even when the fit is correct. The All Terrain Ultra, a new model in the Equine Fusion range, aims to address these issues by combining the unique sole of the All Terrain with the more adjustable fastening system of the Ultra.

Size	Size Range Length	Size Range Width	Break over - Point	Weight
10	9.6-10.5 cm (3 3/4 - 4 1/8")	up to 10 cm (3 15/16")	10 mm	293 gr
11	10.6-11.5 cm (4 3/16 - 4 1/2")	up to 11 cm (4 5/16")	10 mm	342 gr
12	11.6-12.5 cm (4 9/16 - 4 15/16")	up to 12 cm (4 3/4")	10 mm	386 gr
13	12.6-13.5 cm (4 15/16 - 5 5/16")	up to 13 cm (5 1/8")	10 mm	429 gr
14	13.6-14.5 cm (5 3/8 - 5 11/16")	up to 14 cm (5 1/2")	10 mm	529 gr
15	14.6-15.5 cm (5 3/4 - 6 1/8")	up to 15 cm (5 15/16")	10 mm	607 gr
16	15.6-16.5 cm (6 1/8 - 6 1/2")	up to 16 cm (6 5/16")	10 mm	658 gr

Dampening Factor		Terrain
Sole	Medium +	Hard to medium soft, plus ice (when Stud Kit All Terrain installed)
Sole with pad	Soft +	

All Terrain Ultra

QUICK STEP- installation

1. Open the shoe wide.

2. Place the shoe on the hoof. Make sure that the toe is all the way in front of the shoe, and that the shoe is centered in the back

3. Put the Velcro together on both sides. Make sure to tuck both sides in, to optimize the fit of the upper part.

4. Fasten the strap in the back by pulling it through both rings, before pulling it back through the last ring.

5. Pull strap to tighten. Secure the strap by pulling it through the loop.

6. Tighten the lock in front by pulling the strap. Use a hoof pick to secure the strap. Ready to run!
